Reasons for Allowance

The following is an examiner's statement of reasons for allowance: Applicants' process for preparing tertiary butyl alcohol (TBA) is unobvious over the prior art of record. Although the closest prior art of record {EP 0415310} teaches a process for preparing TBA via reactive distillation of isobutene feed with water over a solid acidic catalyst, the prior art of record does not teach or suggest the inclusion of TBA along with the isobutene feed and water and then feeding this mixture into the reactive distillation column below the reaction zone. Such a teaching would have been counter-intuitive to one having ordinary skill in the art, in that, it is expressly taught in the prior art that water is effectively added above the reaction zone of the reactive distillation column and including the desired product in the reactant mix is counter to general chemical practice when considering that unwanted by-products may be formed (in the instant case, the formation of tert-butyl ether). All claims (1-10) are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elvis O. Price whose telephone number is 571 272-0644. The examiner can normally be reached on 8:30am to 5:00pm.
